

FIVERR CASH COW

Disclaimer: This WSO is for informational purposes only. This eBook is not going to provide you with a bizopp. All refunds should be sent to joelswohelpdesk@gmail.com - Do not dispute or ask on the thread. That's all I ask of you.

Fiverr Cash Cow is my brand new WSO. It gives you an exciting new chance to make more money from the Fiverr industry without trying to compete against everybody else selling the same ole' same ole' services.

Thank you for purchasing my new WSO. It's taking some very useful information, and you are getting some very bold techniques on capitalizing off of the Fiverr platform again.

This WSO is not going to be a retold story about using Fiverr.

This isn't a technique that has been shared over and over again. This WSO is by far one of the newest and most innovative ways to rake in cash from Fiverr.

What Is This WSO?

This WSO gives you a simple copy and paste system you can do over and over again over the course of as many gigs as you choose.

I have had days where I literally would get 30-40 orders in a single day, and it's a lot to handle. But I would deliver my gigs in a few minutes and get all orders done almost within

the end of the day. The problem is....by the next day, I'd end up having to do almost the same amount of work because of the huge orders.

It's hard to handle this many orders. I really don't have a whole lot of time in my hands to care for everybody who needs this service, and this is why I am not scared to share this info.

Could you handle this many orders?

Obviously, this isn't such a huge problem. I mean, who wouldn't want this many orders? I definitely love Fiverr, and I do not make multiple gigs like I used to because I always get bombarded with orders, and since this isn't my only source of income, I can sort of not use it all the time since I do have other income sources.

How did you discover this?

I discovered this by simply using Fiverr everyday, browsing on the site everyday, but after so many years of being on the site, I noticed a small trend. I noticed something happening within the site.

I found out about this from another user who was selling multiple services of one thing that I really needed.

And then it dawned on me that, "Hey, I think I could actually

sell this myself." It shocked me at how great this simple idea was.

I tried to sell it through my own little small way of thinking, but I couldn't make a single sale.

It wasn't until I made these small changes that I finally succeeded.

Can you outsource this?

I have actually outsourced this work to a person for a good \$2-3 an hour. I only outsource this when I get 10+ orders, because while it does take only a few minutes each time to deliver each gig,

You want to get started?

Before I begin, I would like to let you know that this simple business idea works like crazy.

It has made me a massive amount of cash over the past few months almost on autopilot.

Sign Up To Fiverr

I made a WSO last time about Fiverr as well, and the biggest

complaint I got was all about me talking too much about Fiverr and getting your account, and other small stuff like that. The truth is that when you buy WSOs about Fiverr (or about a similar topic), you get the same ideas and same stuff every time before you get to the meat of the WSO.

This is why I am going to be going STRAIGHT into the idea of this WSO.

Of course, this wouldn't be a complete WSO without me giving you at least some of the basic stuff.

- Make a video

I highly recommend you MAKE a video for this type of gig. A video of you talking is the most powerful, but using anything is worth doing. I always say to consider having a professional reviewer do the talking for you. It could cost only \$5 on Fiverr to have somebody make a video for you. This is a nice little trick to get a good looking video. You could try to make a few sales to use as your investment for the video if you don't want to make an upfront cost. At first you don't need a video if you don't want to, but it's worth getting, or making on your own.

- You only need to use one account

My last WSO about Fiverr was about making multiple accounts, but this time, you only need to have one good

strong account to have it built.

Sign Up To Fiverr

You need a Fiverr account. Most likely you already have one, so just use that one if you already have one. You don't need to be niche specific with this type of service, but it sure does help out a lot. I would highly recommend that you just use any account you have.

Setting Up A Gig

This is a very simple thing to do, and with all the free articles you can find online, I don't think I have to talk about finding the right photo for your gig, as that could be answered in a single Google search. Setting up your account is the same thing. As long as you can make an account on this site, you can follow along easily. I really don't want to worry about teaching the basics of Fiverr, so I'm just going to go straight to it alright. I also don't want to spend 10 pages talking about Fiverr.

Tags – There really isn't a secret to this except to use your own judgment. If you were looking for this exact service on Fiverr, what would you type in to Fiverr

If you ever want some specific help about this, don't hesitate

to ask for help via my email support desk at joelswsohelpdesk@gmail.com

- Let's Start!

What you'll be selling is **BACKLINKS!**

Now, don't go and close this WSO just yet. Backlinks are extremely beneficial to people on Fiverr. You could be selling a few backlinks for an easy \$5.

Some people are willing to pay so much more for these kinds of backlinks that I am going to show you.

You probably don't know how to get those backlinks, or you probably don't think they will sell.

Trust me, when you do it the way I am going to teach you, backlinks are going to make you big cash.

The Gig

To setup your gig successfully, you really need to make your title: "I Will "Get You 10 High PR Backlinks"

Or anything similar. I highly recommend just going through the list of different Fiverr gigs that offer backlinks. A ton of people offer backlinks, but only a few really ever get the attention. There's really just a few people here who offer

quality backlinks as well.

Description: (to write the description, do not just copy this into your Fiverr gigs. I would really appreciate it if you could use this merely as a guideline. Also, consider using these words, but do not just copy everything. This is not the exact copy of my listing just to avoid it being copied, but use this as a guideline. This is what gets people interested.

"High PR Backlinks

Rank For Your Site Easier

Fast Backlinks

Blog Comments

DoFollow Links

SEO-Friendly

Google Safe

Edu and Gov backlinks - Completely Whitehat

Fast Delivery

500+ Additional Bonus FREE *SEO-SAFE* Backlinks with EVERY Order

Contact me if you'd like to know more about these backlinks, or if you're ready, order away. These backlinks are all top quality, safe, and Google-friendly."

That's it. Descriptions don't have to be perfect at all. It's stressful sometimes when people try to over complicate things. In The Internet marketing world, believe it or not, bullet points are loved. Just keep it short. Get people interested. And get that sale.

Delivering The Gig

There are multiple ways to offer and deliver these gigs. With the different ways to do this, you really need to see what you feel like is the best way. For example, I would highly recommend doing it manually, which I will be showing you. I have used softwares, but I don't want to recommend any to avoid some people thinking I only want them to buy the software through my affiliate links or anything.

What I am going to show you is a manual way to do this. Don't worry, it only takes 5-7 minutes just to deliver these backlinks. I love doing SEO backlinks by doing blog commenting because it works, and the best part is that you can always put it in your title, "I will manually deliver you 10 High PR backlinks." It is considered to be more high quality when you do them manually.

People will see that they aren't going to get bad backlinks. They know that it won't damage their success online with their site because they aren't getting thousands of useless backlinks that will only damage their money site.

If you would like to use a software, you could always do that with Senuke and other social bookmarking backlink softwares. But I will be talking about manual gigs just to make it much more powerful, more reliable, and will get you more sales. People on Fiverr with regards to backlinks love MANUAL.

How To Deliver The Gig

I am going to show you how to find aging domains with high PR.

At this point in time, what I would like for you to do is try to find a list of 30-50 different websites. Once you find about 50 different sites, save the URLs. When you get orders, you basically start writing the comments for the clients.

Blog comments only need to be about 2-5 sentences. If you include a quality leading sentence to your URL, you will get those comments approved. As long as they are not spammy comments, you will succeed in the long run.

Finding Backlinks

You basically will be finding blogs to comment on. There are many high PR blogs that are great to use for making comments on.

There is a very simple way to do this. When I started doing this, I couldn't find these blog comments that easily, and it was so hard to do it. I found this article recently, and wow, it's filled with tons of ways to locate these blogs. Just read through it, look for those blogs, and use those blogs to comment.

<http://solutionpointh2z.blogspot.com/2012/10/how-to-get-edu-backlinks-to-your-blog.html>

My favorite link to use to find on Google is:

site:.edu inurl:blog "post a comment"

You'll find there are thousands of sites you could use. Some of the blogs actually allow for you to just paste the URL of your client and it'll instantly be anchored text.

You'll have to sift through countless sites before you find 10+ that you could visit over and over again for your clients.

Making comments.

You want to make a set of different comments that you could just copy and paste, and then edit for the different sites.

One that I like is:

- 1) "I really like how you talked about (topic name). That

idea/tip on (insert tip or idea here) was very helpful. I have a site built around (insert topic here). Feel free to my check it out if you'd like to: (the URL of your client)

Make sure to save the URL. Showcase just two or three of the URLs to the clients just so that they can't see all the websites.

Some may ask for all of the URLs. If they do this, just feel free to give them all of them. As long as you got give them the service, it's completely fine.

You also want to benefit them with these two sources. Most newbies who have websites don't even have their site into different web directories. These sites will give websites instant fast and quick backlinks that only take a second for you to do. type in the website URL, and it'll tend backlinks to them.

I tell clients when they ask what kind of backlinks they are that they are top quality backlinks with a software I use.

These two sites are very safe and reliable to use.

<http://www.dirurl.com>

http://www.imtalk.org/cms_index.php?pageid=IMT-Website-Submitter

Send them the URLs of the comments, and deliver the gig. Let them know you've taken care of it. Again, getting this setup takes some time, but when you are trying deliver the gig for somebody, it could take you as little 7 minutes. 7 minutes was my best time of choosing 10 blogs, writing 10 comments on each one and just changing them up, and then giving them the links. It takes some time for some sites to accept comments, but this is why you cannot slack off and make bad boring comments.

Sometimes, some of my comments may not be accepted, and the website owner will just be confused, and so they'll send me a message sometimes.

Tips on Delivering and Handling Orders

(When somebody buys a gig, make sure that you give them a quick "thank you", but dont forget to mention randomly.

(Note: Put up that you'll do the gig within 2-3 days. You don't want to be rushed, especially if you are going to be making this your side income on the site.)

When delivering your gig, put the URLs in a word doc and turn it into a PDF file, text file, or anything you choose.

Your word doc should say the following:

"Thank you for buying this gig. I really do appreciate it. The links below all have comments made towards your site.

Thank you.

(URL)

(URL)

(URL)

I would just like to let you know that it have been doing SEO for awhile now. Please check out the following links if you want to succeed even further with your SEO. I have used these sources to getting more rankings and traffic. (Affiliate link to SEO/traffic products)"

Making \$100/daily from Fiverr Selling Affiliate Products

This is why you need to send them a short PDF so you could give them your affiliate links. Go to Clickbank, or even choose a product from the WarriorPlus system. Find something that is very traffic related and will benefit your buyers. Grab your affiliate link. And then put it in the PDF. Make more cash this way.

I have made an easy \$50-\$80 a day with this. It's not

uncommon for me to have \$100/days doing this. If you have 10 gig orders a day (which is so little when you get started doing this), all you need is 2 people to buy a \$40 Clickbank product to make \$80 bucks.

You can edit the PDF to fit into what you feel works the best.

As we begin to look at this WSO, you need to realize that it does require *some work. It isn't exactly a difficult or impossible thing to sell, and you'll come to find that this business is very lucrative. I still make a great extra income doing this. Don't be scared to make multiple gigs offering literally the same thing but just in different formats.

You may find that buying Senuke or any other traffic software can help you get even more backlinks to clients. It's amazing at how many people will continue going back to you when you offer software related backlinks.

Get FREE Tips

A lot of my earnings are from TIPS. I know, right? It's cool getting free random money.

What are tips?

They're basically an upgraded gig I use. I think you have to wait until you're Level 2 to get to add additional gigs for your current gigs, but I know this has changed recently. When I started on Fiverr a very long time ago, I don't even think there was levels.

What these tips are is basically telling them "I will graciously accept a tip for doing my best to serve you for \$5."

Let's just say, many people offer these at random. You never know when somebody is going to offer you more cash just because they want to.

- Always remember that you can double this idea very easily by simply having different gigs but making them look similar. So you could offer 10 high pr backlinks, and then on another gig you would sell 5 high pr backlinks and you'll ping them right after. Use the two sites above that I have you to get instant backlinks.

Just being creative goes a long way when creating these gigs.

Outsourcing

The only type of outsourcing I've ever done when using this system is to have somebody write the comments for me. I'd give them the URLs of the client, the websites of all the URLs for the comments, and then have them write the

comments. This is only worth doing if you have 20+ orders on a consistent basis, so try to do the work on your own when you're just beginning. A virtual assistant and hiring them for a good \$5 and hour, and hiring them for about 2 hours is all you need to have them finish the orders.

Do NOT leave this WSO on your hard drive. This simple method can rake you massive cash every single day if you work at it.

This WSO will not make you rich by reading it by any means. In fact, it requires some work, and action is definitely needed to get yourself on the right track.

If you're looking for a new way to start off the year using a reliable method, this is the way to go. Fiverr Cash Cow is a new and unique WSO of mine, and I hope you will use this to your advantage to start raking in the money on Fiverr.
