

How to get

UNLIMITED

Fiverr

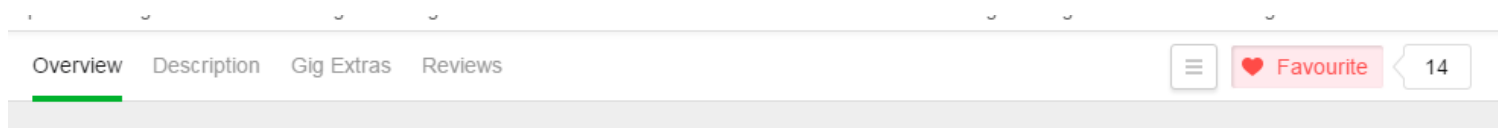

Favourites

Hey guys, in the previous ‘ranking Fiverr gigs’ PDF, I stated that favourites is one factor that can help rankings EXPLODE. Now what if I told you that I have found a secret method that allows you to get UNLIMITED favourites?

Well that’s what I’m going to expose to you right now. This method is completely BRAND NEW. No one from any other Fiverr guide has mentioned this secret. Now do with it as you please. It’s up to you if you want 10 favourites or 1,000. Just don’t share the secret sauce.

Are you ready to know how to get UNLIMITED favourites? This is how you do it.

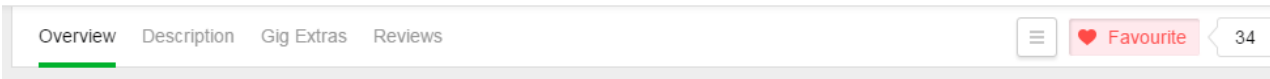

- 1) First of all, you need to go to your gig page. So go to your gig page and you should see a button on the top right hand corner that says “favourite”.**
- 2) Secondly, what you need to do is click on the**

“save in” button on the left side of the “favourite” button. It’s the button with the 3 lines going vertically.

3) Once you are on there, it says “add collection”. Now all you need to do is write in random things. It doesn’t matter what you write as long as it is longer than 5 characters and less than 52.

4) Once you have added a few collections (I recommend at least 20), you are going to want to check and uncheck them. Do this a couple of times and then check them all. Reload the page and your favourites should now be higher.

5) 

As you can see, the favourites are now higher.

Simply rinse and repeat and you should now be able to add UNLIMITED favourites on your gig.
