# Introduction

Hey!

I'd first like to thank you for purchasing this book.

You are **AWESOME**.

It's people like you that make creating these information products to help people worth it.

My name is Corey and I put together this book to help people struggling on Fiverr when it comes to figuring out what to sell. Fiverr allows for 20 gigs per account, and a lot of users only create 2-3 gigs total!

To best optimize your earnings potential on Fiverr, I'd recommend using up all 20 gigs. This book will help you find other gigs you can easily sell on Fiverr, many of which only require a few tools on the internet and little skill.

I also think it's worth mentioning that I do have a weekly blog that covers the world of Fiverr with tips, discussions and articles. You can check it out at [makefiverrmoney.com](http://makefiverrmoney.com).

I have organized this book into sections/categories for each type of gigs you can sell on Fiverr.

This book will only provide you with gig ideas and how to go about selling them. This book does not show you how to optimize your gig for sales on Fiverr. I do have a book called [Fiverr Success](#) which shows you how I earn \$4000 a month on Fiverr and how I optimize my gigs and profile for sales on Fiverr.

# Digital Products/Downloads

In this section, I'm going to share in-demand downloadable products. Now, when selling these, you could manually deliver each order by uploading the product to the buyer and completing the order. However, this entire process can be automated so you'll virtually never have to log into Fiverr again.
