A Brief Forward:

Perhaps the most repeatedly asked question I see on the Warrior Forum is *"How do I get started?"*

or

"What's a quick way I can make money without experience or a list?"

Without fail these questions are inevitably asked everyday by those who are vigilantly searching for answers on how to make money online. I know those are the questions I asked when I first started. I just wanted a simple system to make some money online that actually worked without all the fluff or spending months learning the complexities of internet marketing. I wish I had the information i'm about to give you back then. It took me years to figure it out but the answer to the questions above is *"arbitrage"*!

The premise of arbitrage is a simple one; buy low and sell high. But it's extremely powerful! If done in the right way with the right tools & sources one can see vast earnings potential. That's what I hope to share with you today: an arbitrage method presented in an easy to understand, systematic way so you can realize

your own earnings potential! So read on, learn something new, take action and find success!

I wish you all the best!

The Method:

So as mentioned above the way arbitrage works is to buy low from one source and sell high on another source. This is perhaps the simplest business model there is, it's also extremely profitable! What I'm going to teach you is how to source hot selling profitable items on amazon and then resell them on other marketplaces for a nice profit.

Step 1: Sourcing Hot Selling Items;

So where do you find hot and in-demand products that you can buy at a low price and resell higher for a profit? The answer may surprise you, it's the world's biggest online retailer <http://www.amazon.com/>

Amazon has a catalog of more than 200 Million individual products, and a

considerable number of these products are highly discounted. They range from clothing items to sophisticated electronics and everything else in between. Many of these discounted items are hugely popular and high in demand. And that's what we're going to focus on, finding these hot products for a discount and then reselling them for a profit on other popular marketplaces.

So let's dive right into it; how do we find these products?

My #1 Secret Source: <http://www.nonozama.com/>

This little known site offers extraordinary updated data on products you can buy and flip for a profit. As you might have noticed already the products aren't exclusive to amazon; there are many retailers listed on this site whose products you can flip but for the purpose of simplicity we'll stick to Amazon. The products are sorted by popularity but the really cool part about this site is it also gives you all the numbers you need to calculate your profit margin.

Let's take a look at how it works!

1. Enter Nonozama and click on the Amazon link to view all the amazon products.

Find retail arbitrage opportunities online.

we'd love you to share.

collapse estimate profit

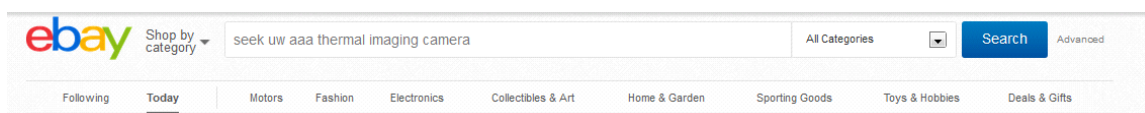

Not bad, it's giving us an estimate of \$21.66 profit. *However, because there are many factors affecting selling fees and the final sales price take note that the margin could be much greater than what the listed estimate is.* We need to do some more research to gain a better idea of what we can sell for to maximize our profit.

By clicking on the "show sold listings button we can also see recently sold units through eBay to gain better insight as to what price we can sell for.

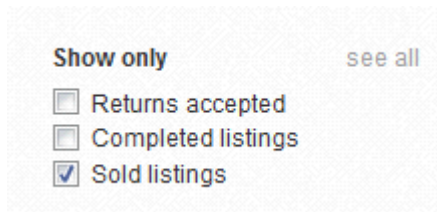

As you can see this item has been sold recently for as high as \$270 and consistently around \$240. That's a good indication that this item is selling for more than the listed average price and additional profit.

But let's dive even deeper to get more sales history and numbers. Go to <http://www.ebay.com/> and type in the product name in the search bar; then click search.

A list of your items will pop up and what we want to do is find a list of the sold items. Scroll down and look on the left-hand side of the page for "sold listings"

and check the box.

The image shows a filter menu with a light gray background. At the top, there are two links: "Show only" in bold and "see all" in a lighter font. Below these links are three items, each with a checkbox and a label: "Returns accepted" with an unchecked checkbox, "Completed listings" with an unchecked checkbox, and "Sold listings" with a checked checkbox (indicated by a blue checkmark).

Now you will see a much better detailed list of all the recently sold items. We can use this information to better gauge a selling price and see how well our selected item is selling.

The Seek allows you to literally see heat, making it possible to spot people and animals in daylight, total darkness, or in obscured visibility conditions. This true thermal imaging camera uses the data from over 32,000 thermal pixels to create a visible image on your smartphone. Prior to the Seek Thermal camera, this type of resolution was only available in cameras costing \$3,000 and above. A few common ways to use the Seek Thermal camera:

- This thermal imaging camera for your Android smartphone detects infrared light and creates a visible image on your screen.
- In broad daylight or complete darkness, you can now detect levels of hot and cold, water leaks, and more.
- Simply plug Seek into the USB port of your Android smartphone to generate high quality imagery.
- Seek captures heat signatures and converts them into an easy and convenient real time picture for your smartphone device.
- Useful for homeowners, inspectors, contractors, and more.

Under details you can use the manufacturer's specs or write your own. Look at the sold listings again if you want to see and incorporate what other sellers have

said.

Next, choose to list your item as "Fixed Price" with the selling price you deem appropriate.

Cultivating the entrepreneurs mind for continued success:

In any business there are challenges, the two biggest reasons I see why internet marketers don't succeed are:

1. Lack of action; most people who start something never finish it because they lack action and follow-through. They quit at the first sign of a challenge. Do you want to know the key formula to overcoming this? It's "persistence;" meaning that you consciously make the decision you'll never quit. If you've already made

up in your mind that you'll just quit if something doesn't work out exactly the way you want it to, you've already failed before you've even begun. Create a strong conviction inside yourself that you will succeed and no hurdle can stop you.

2. The willingness to try new and different ideas: Don't be afraid to try new ideas, a lot of the time when we hear a new idea we say, "That can't work for me" because of a number of different excuses. Be bold and willing to try a different approach on new business ideas. If you reach a hurdle and don't know what to do next, use your creativity to try and navigate through the problem. Chances are you'll come out with a solution that puts you above and beyond your competition.

I want to hear your success stories and if you have any questions please feel free to contact me through the forum. In addition please read through the Arbitrage Retail Secrets bonus eBook. I distilled my Retail flipping knowledge into it to create a guide that can launch your ecommerce business into new heights! I hope you will use it to create a long lasting, profitable business!
