Hello and thanks for buying Video Profit Masters. I decided to write this course as it's something that works and I really believe in the power of video marketing, in my eyes it's the future of Internet marketing. I also have bought a lot of eBooks, courses and software that turned out to be crap....turned out by people who just want to make money from people's desire to get rich quick and write great sales pages promising the world and delivering nothing. Many of the guides lack the relevant info; you spend most of your time trying to figure them out. My point is there are a lot of BS products out there....though there are also some very good products made by people who really care about helping others. I really hope you enjoy this and find it as step by step as I promised...

*In this guide I am going to show you the methods that I use to rank videos and URL's on Google page one. Video marketing is the future and it's much easier to rank a video than rank a wordpress site. Just remember that Google owns YouTube so they like to have video's ranked highly and are more unforgiving if you create some 'bad' backlinks. Ranking a site for a super competitive keyword is as you know very hard and requires not just off page SEO but great and unique content. It used to be possible to build a wordpress site and buy a package of backlinks and get your site to number 1 in days....this is no longer possible but due to Google's love of YouTube and what I am about to show you we can rank video's for competitive keywords.*

*When researching your keywords, look on the first page of Google and see if there are any videos there already, if there is it's a very good sign and it should be no problem to get your video up there, if there's no videos there already you may still be able to get one up there but it is much easier if there are some videos there already. Also have a look around and see what other kind of sites are there....do some recce...check out your competition.*

---

*This course and technique can be used for people who just want to build an information video and then have the affiliate link below leading straight through to the sales page they are trying to promote. If you are doing this I would suggest using <http://tinyurl.com/>, with tiny.com you can now add your own words at the end of the URL so for example <http://tinyurl.com/EkkoResources>. This looks much better than just tiny.com, though I will show you how I get people to click the link no matter what.*

*We can also use this technique for people who were hit very badly by the Panda and other zoo animal updates from the big G. Instead of having your website stuck in SERP 1289 or something similar you can use a video to have your website back on page 1 through being in the description under your video which I will explain soon There is also a couple of little bonus techniques I will include at the end.*

*For complete beginners: You will need an affiliate account and the most popular are [Amazon Associates](#), [Clickbank](#), [JVZoo.com](#), [Warrior Plus](#) and a new affiliate program that has tons of very specific products...it is called [markethealth.com](#) all are free to join.*

**OK, let's get going...**

# Video Profit Masters

## Video Creation – Step 1

\* Since this is called Video Profit Masters, I guess we are going to need a video. Some courses will tell you that you need a video with pages and pages of information, now this can be one way to do it. If you are going to make a video like that remember that Google cannot read what is written on your actual video so there's no point in trying to make it keyword rich, what you will do is optimize the description below (which I will explain shortly).

Now there are several ways and types of video that we can make. If you have windows then you will have "windows live movie maker". At first it looks daunting but it is actually really easy to use. What I do is I create a folder on my desktop and use my snipping tool to cut pictures and 'save as' into this folder, for a 2 minute video you will need about 7 to 10 pictures. Then if I want to put some text in the video so it's not just pictures and music I simply use 'word document' and write a short paragraph or a few sentences, play with the font and the coloring and size and then use your snipping tool to snip the words/paragraph and 'save as' again to your folder. Then all you do is start adding them into the windows movie maker in the order you want seen, maybe change the speed to slow it down when it comes to your words/info and add some background music. I recommend that you download some free background music from u torrent, the site [kickass torrents](http://kickass.torrents) is what I use.

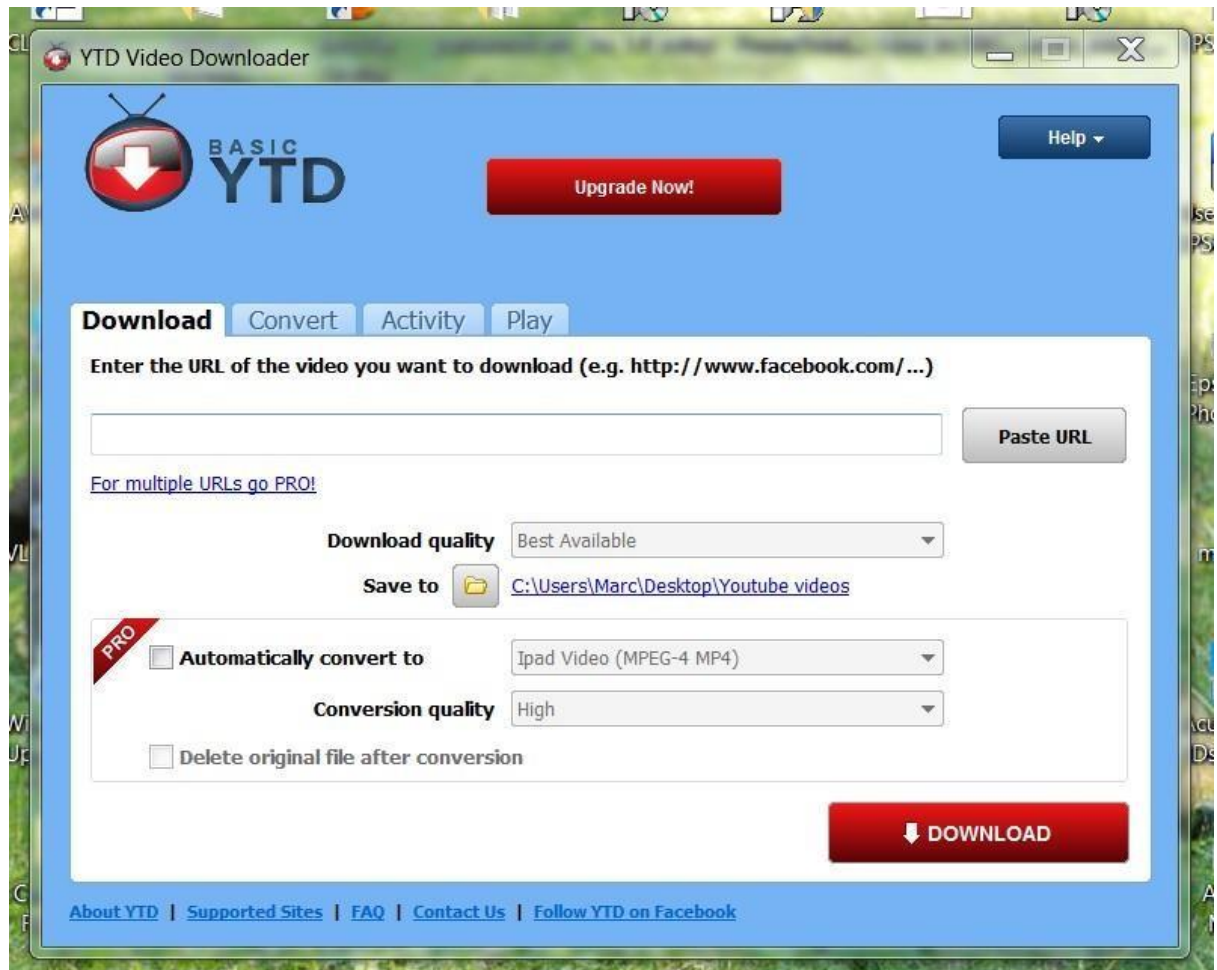

Another method that you can use is too make a free 30 second video with [animoto.com](http://animoto.com) (or get the paid version). If using the free version it's very self-explanatory and your just snipping pictures and sentences like described above. The only problem with the free version is you can't download it, you have to upload it direct to YouTube and change the description etc. I have to say though that for this method paying the 5\$ per month to make unlimited longer videos is definitely worth it...

The next method that I have used in the past is of course using someone on [fiverr.com](http://fiverr.com) (Fiverr being the site where people will do anything for 5\$)

Some people make a PowerPoint presentation and then use [camstudio](http://camstudio) to upload it into video form. I think it is a great method if you want to make a very detailed and informative video this could be the way to go. I've never used this method so I won't go into details on how to do it, though I have recently started to use [camstudio](http://camstudio) for making screen capture videos which are great as it records what is on your screen and your voice so if you want to make completely free videos without showing your face, this is a great way to go.

Just remember that it's the description below the video that is going to get you ranked along with some other tricks shown in this method. If you would like to use this method there are hundreds of videos on YouTube explaining exactly how.

Last method is to use someone else's video....and use it as your own. Now I am telling you this at your own risk. Don't steal a video of little Jimmy's birthday party and use that to promote your product....use discretion. Or contact the owner and ask them.....If you do use this method simply download the [YTD video downloader](#). It's super easy to use.

**Point – Always name the video file of the keyword that you are going to target before uploading. \*\*\*\*\***

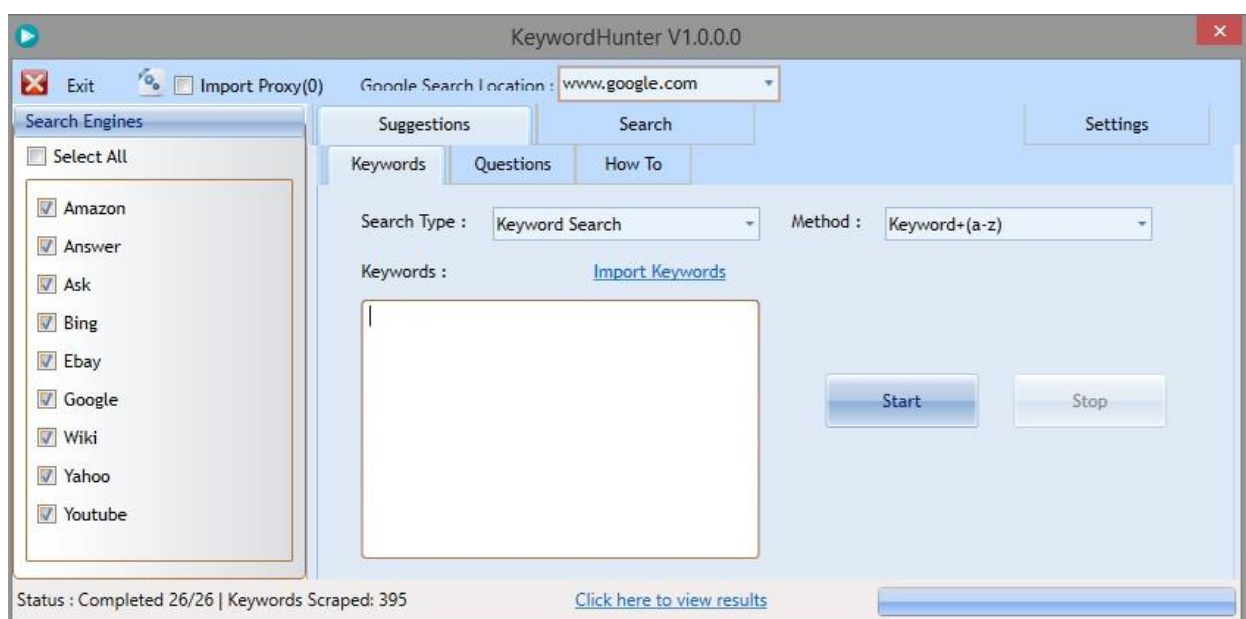

## Keyword Research and Niche's – Step 2

\*Now depending on if you're making your video for a website that you already have or whether you're simply making a video to get ranked on page 1 and have your affiliate link there you will need to do some keyword research. I really don't want to go into too many details as I could be here all day and I'm sure most people are already aware of how to do keyword research. Though the best KW's to go for are of course buyer keywords. Keywords that help people to solve a problem, even better if it's a problem that they are embarrassed about or desperately need a cure for or something that they feel will really help them to achieve something, like lose weight or make money. That's why some of the hardest but most profitable niches to crack are weight loss and making money online....Here is a list of other niches you may want to look into

**Acne , Acid Reflux, Back Pain , Business, Dating ,Dog Training, Diabetes, Forex, Gardening, Golf, Gaming, Guitar, Health, Hypnosis, Investing, Internet Marketing , Muscle Building, Mortgage, Online Travel, Parenting, Public Speaking, Quit Smoking, Insurance, Stress Management, Time Management, Photography, Teeth Whitening, Tattoo, Snoring, Pregnancy, Wedding, Gambling.....(If you try markethealth then there are a load of new and interesting buyer keywords like "mango face scrub review")**

The best free tool to use is [Google keywords platform](#). Though an expensive option but worth it is [Market Samurai](#) and you can get a free limited use trial. While this system is powerful I would not go for keywords with over 5,000 monthly searches but if you do just make sure that there is already a video on that page with under 20,000 views and be prepared to build more backlinks as explained later in this guide. The more monthly views that the keyword you are targeting has then the harder it will be to rank your video!

After using the Keyword Planner you can always try this partly free software [HQSuggest Keyword Research Software](#). Once you have signed up for it for free they send a key to activate (it went to my spam box on gmail). It is a great free little tool to use together with Google Keyword Planner. Here it is below.

**\*Note – Maybe it's better to make 50 videos with low search results that you know will rank easier than 1 video that you have to spend a lot on views and linking. 50 videos making 5\$ per day is 250\$, that would be a monthly income of over 7500\$, and remember that once the video is up there it's making money on auto pilot.**

**When using the Google planner you will be able to create a list like this.**

Your product or service

online marketing Get ideas Modify search

Ad group ideas Keyword ideas Download Add all (801)

Search terms	Avg. monthly searches	Competition	Suggested bid	Ad impr. share	Add to plan
online marketing	49,500	High	K€156.33	–	»

## Optimizing your content – Step 3

**\*Now you have done your keyword research and have made your catchy/cool/informative video it's time to upload it to YouTube. First thing is the title.**

**I always just use my main keyword plus review and is it a scam????? Or something like that. Next you have to write your description....now this is one of the key elements. I usually write about 500 to 700 words and use the keyword in the main description 5 to 7 times. I also put my affiliate link or website directly below the**

**video. So it will look like this**

**-Video then below you should have –**

Click here to find out more (or just click here, depending on what the topic is)-then your affiliate link or website.

-Next you list your main keywords

-Now your 500 – 700 word description....this is so important as it contains your keywords and will be what Google picks up on.

-Again write click here etc and your website or affiliate link.

-And lastly I write my main keywords again.

When it comes to tags always use your main keyword as the first tag and don't feel bad about using the rest of the tags from people whose videos are trying to rank for the same keyword.....or from your Google keyword Planner

Something like this one that I created a few days ago. The only thing different from what I have been telling you is this is a video that I used for my Online Marketing Site which will be super tough to rank for these keywords...but from experience I know I'll get there!!

## Get noticed and increase traffic – Step 4

**\*Next we want to get some real organic views to your video....get it noticed. Get some comments and likes. You can do all this for free if on a budget or you can do it for 1 to**

**5 Dollars. Go to [vagex.com](http://vagex.com) and create an account there. Set up your YouTube link and share your credits (either earned or paid for) between views, likes and comments. Now the good thing about this site is that it is not any BS bot traffic but real people who watch your video to earn credits. This is also how you can earn credits to use for your likes, views and comments.**

## Extra Juice – Step 5

\*If you were using this method to bring an old website back to life or even promote a new one then create a new page on your wordpress site if you have one and embed your video there. Now remember the key here is to embed it. Also if you have a blog or have a friend with one embed it there as well. Embedding your video is one of the secret keys to this....more soon about that!!

To do this go to your video, click share then click embed and this gives you the code needed to embed your video on other sites...this really is the secret sauce so don't forget it!!

## Let's Get Social and get our Video out to the masses – Step 6

Firstly you will want to post your video to as many social sites as possible. Here is a good list to get you started...

<http://www.facebook.com>

<http://www.twitter.com>

<http://plus.google.com>

<http://www.delicious.com>

<http://www.stumbleupon.com>

<http://www.tumblr.com>

<http://www.myspace.com>

<http://www.pinterest.com>

<http://www.reddit.com>

<http://www.linkedin.com>

<http://www.flickr.com>

<http://www.wikia.com>

**\*Next you want to bookmark your YouTube URL to as many bookmarks as possible. To do this for free go to [SocialMarker.com](http://SocialMarker.com), it's very easy but does require a bit of grunt work the first time round. Other options would be to use Fiverr.**

---

## **Pinging Time / Time for Google to Know about us – Step 7**

**\*Keep a note of all submitted links on a note pad and ping using a [Bulk Pinger](#).**

**Or here are a few more options**

**[Pingfarm](#)**

**[Pingates](#)**

## **Powerhouse Time / Backlinking – Step 8**

**Sometimes this will be enough to get you on the front page depending how much competition your keyword has, though it won't happen overnight....though what I like to do is buy some .EDU links for your YouTube URL. Again you can find these on fiverr. If you are on a really tight budget I'm including this resource that enables you to build a variety of backlinks by yourself – [Right Here](#).**

**As with websites creating quality backlinks to your YouTube video is very important. Most people don't ever build backlinks to their video so if you are aiming for a Keyword with a higher competition then I suggest building some quality backlinks**

either yourself or using Fiverr. Remember also that if you buy some crappy backlinks from Fiverr or where ever then Google is much less likely to punish you because it's YouTube....though don't go out and buy a link package of 100,000 spammy backlinks!!

---

## Secret Tip / Ultimate Juice – Step 9

\*Now if you want to create some real authority and power then I'm including a list of web 2.0's that you will be able to embed your video on and you will see the massive power and juice you will get from doing this....Once again have that note pad open and keep every link that your video is on and when done Mass Ping again.

As you are going to be doing this a lot you should keep an active site with some info already there, perhaps use PLR for articles...

List of Web 2.0's that you can embed your HTML code on.

<http://wordpress.com>

<http://www.squidoo.com>

<http://www.livejournal.com/>

<http://www.bravenet.com/>

<http://www.blogger.com>

<https://www.tumblr.com/>

<http://www.webs.com/>

<http://www.weebly.com/>

<http://www.xanga.com/>

<http://blog.com/>

## Extra Coverage- Step 10

Now that you have your video, why not get it onto the multiple other sites out there. The more your video is out there the more coverage and potential profits you can make. Try some of these popular sites (This can be outsourced through fiverr)

Megavideo

MySpace TV

LiveLeak

Break

Metacafe

VideoSift

Yahoo Video

Veoh

---

## More Traffic Tips – Step 11

Another technique to drive more traffic and views, potentially in the thousands is by finding a video in the same niche as one of your videos with lots of views and posting a video response to that video. To do this go to the video you want to post a response to and click on the box that you would leave a comment in and write something like “Cool video” then below post your own YouTube link to your video. YouTube keeps changing and we used to be able to do something called video share comment but that option is no longer available and if you try to post an affiliate link or any link besides your YouTube URL it will most likely become unclick able!

ALL COMMENTS (57)

Great video...check out mine!

<https://www.youtube.com/watch?v=AAiullgiuc8>

☒ Also share on Google+

Post

## Sniper technique – Extra Bonus

\*Everything is the same, creating a video, bookmarking and building some links except this time you can create your video for a certain product (make it a more review type of video). Now if you want to be really smart you can find out about up and coming products through JVZoo.com.....how often do you get emails telling you about the next best thing coming soon?? A lot probably....to get approved for the product on JVZoo or W+ you need to send a request. Now you can either just click approve or leave a small comment, in the comment box either tell quickly how you plan to promote this and even send your website if you have one or send your FB page.

This method is called Launch Jacking...

The most common keywords for this method are

Product name

Product name review

Buy product

Product name scam

---

## **Dominate an entire niche – Extra Extra Bonus**

If you really want to dominate a niche and all the buyer keywords in that niche then make a YouTube channel called by the name of that niche. I.e. Dog training Channel and make multiple videos for your different buyer keywords using the tactics shown above. You will end up having multiple videos on page one. Basically dominating a particular niche with all the best buyer keywords, so that people looking to buy in that niche can't escape your quality videos!!

---

## **Never Make a Video Again...Plugins and software**

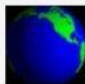

I really want to cover as many ways to make money on YouTube as possible and this is a new way for people who really hate creating videos. What we will promote are plugins and software...Why you ask? Well the thing about plugins and software is that they always have a video showing how the plugin or software works.

Now once you select a plugin or software what you need to do is too download the video and reupload the video to your channel and use the ranking techniques that I have already taught you. Let's look and see how many plugins we can find...

Now you can always add little call to action posts on your video, go to video manager, edit video and click Annotations.

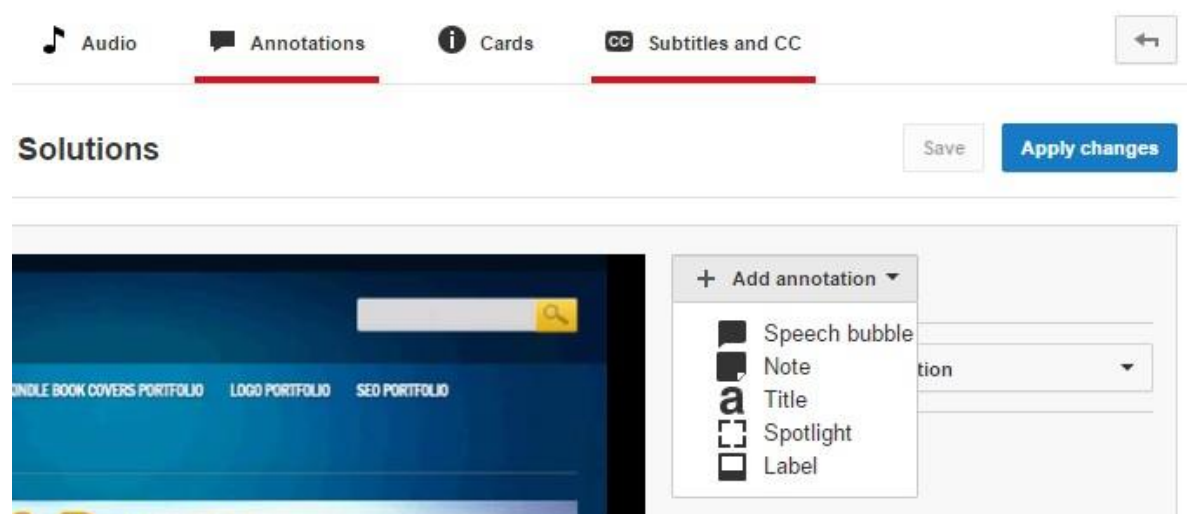

Now you want to select Speech bubble and add in your call to actions...like "click below to go straight to the product". Feel free to also play around here.

Remember that you will need to change the videos slightly before uploading which can be done on YouTube itself..

Here is a step by step video showing you how!

<http://www.youtube.com/watch?v=CXS5cLkKl6Y>

Now don't get me wrong but with the sniper/launch jacking method it will work but the videos will probably only make you good money for a few weeks which is why I recommend using evergreen products if you really want an auto pilot income that lasts. It's like we said before once you have your 30 to 50 videos making you money then all you have to do is check them once a week, if that!!

## Last Thoughts and a few things to consider!!

One last thing to remember is that you can always use CPA offers for this. The great thing about CPA offers are that none has to buy anything, you can get many offers that simply require an email or zip code. You can make a load of money through CPA with this method but remember that you have to get approved for CPA networks. The best ones are in my opinion are [Peerfly](#) and [Maxbounty](#).

If you need help getting approved then feel free to contact me and I will help you!!

Here are some of the email submit offers that are on page 1 in maxbounty

This leads me to a method that a friend told me about and he has been banking big with this.

This method is so simple, here is a break down

- \*Find someone with a video that is getting tons of views but doesn't have an affiliate link in it.
- \*Contact the person and ask if they will put a link below their video for 20\$

That is it....

Now remember that normal people don't understand how we affiliate marketers work and how much we can make....for them 20\$ or whatever you agree could be great for them. They put up the video for fun and now we are offering to give them cash for putting 1 link below their video....

I won't go into too much detail about this as I want you to build your video empire.

- \*Find a video that is getting tons of views

\*Use <https://www.youtube.com/trendsdashboard>

\*Many of these are from major channels but there are a lot from innocent YouTube users that caught or uploaded some crazy event and it has now went viral.

Below are categories that get the most views and interest:

- Music videos (single tracks, remixes, mixes)
- Trailers (movie trailers)
- Games (Minecraft, GTA and etc.)
- Magic tricks
- Viral/event/funny videos (filmed with smartphones by amateurs)
- Pet videos (cute puppies, dogs, cats)

**Keep in mind that any of these categories can be monetized.**

So I typed in “Gaming” into YouTube trends and the first video I clicked on was this

No affiliate links at all....hopefully some kid who will be happy to grab an easy 10 or 20\$. We will make him think he is getting the deal. On any CPA network there are a ton of gaming offers where all you have to do is put in your email and we get anything from 2 to 5\$. Let's say that this video keeps getting views and we get 2\$ minimum per offer and let's say that 20 people per month fill in our offer that is a quick 40\$ per month.

If the video starts to get even more views and we are making even more, let's say 1 video is about funny dogs and getting 500,000 views a month and we put in a trial for a free iPad and 10 people a day fill it in at 3\$ a time, 30\$ per day, 900\$ per month. First we send the owner a little more to keep him sweet but not telling him how much money we are making and these stats I am giving you are the super minimum, like

almost impossible minimum. This could be a way to have a crazy side income and all you have to do is contact the owner....something like this...

*URGENT Advertising Offer,*

*Hi,*

*I'm a big fan of your channel, you have some great stuff. I love this one...*

*<https://www.youtube.com/watch?v=6Vmis8Egm1M>*

*How would you like to make some quick easy cash sent straight to your paypal as soon as today??*

*All you have to do is put a link that I send to you below your video, as soon as I see the link I will send you 20\$ to your paypal!*

*I have a lot of people interested so please act fast if interested,*

*Regards*

*Marc*

Well, I hope you enjoyed Video Profit Masters and take action on it. This does work and can be scaled up as much as you want...

What I have given you is a very powerful method that works, though like everything only works if you take action and have a bit of patience. Not every video is going to be a winner but using this method most will be. This is no push button get rich quick scheme, this is a long term business and will work as long as Google and YouTube are around.

Once you get this method down you can do it in about 20 minutes per video. We have spoken about the earning potential here and this is no pipe dream or theory, this works and if you follow it you will make cash...then it's up to you how far to take it!

How much per month is enough????

Remember 98% of Internet Marketers fail due to not taking action....**be in the 2%.....Good Luck and Get to Work!!!**
