This report is no different. The fat is taken off, and I get right to the lean meat.

What this report is about?

Buying targeted traffic and sending to offers that convert. The one offer in this report is a Biz Opp CPA offer. The traffic sources may be unique to you and may not be unique to others.

But my guess is there are few things you are missing when buying the right traffic that I am going to fix them.

Who is the report for?

You the brand new person or You the experiences online marketer. It does not matter which one you are, making money online is a NEVER ending learning process.

So this report is for those that want to Earn while they Learn.

How will I use what I learn in this report?

I am going to give you very specific details on what you need to do. Click this, sign up for this, upload that, use this, etc.. Take the information and apply it.

Let me be clear here. Some of the information may be over your head and advanced. And there is no way around it. I am trying to make all of this as simple as possible.

So when you get stuck on something don't get frustrated and want to quit. Work through it, maybe search on youtube and see if someone has a video on what needs to be done.

I have been marketing non stop full time for 15 years and everyday I get stuck. But I don't get worked up about it. I figure it out and work through it. My goal for you is to do the same.

If you get totally stuck and nothing online will show you, then I offer a 1 hour coaching call to get you unstuck. [Click here to schedule a coaching call.](#)

Get your optin form from [Aweber](#) and place that inside your landing page.

For a good host for this landing page use [Hostgator](#). And your domain use [Namecheap](#).

You just need one domain and one hosting account. Get the basic account. or starter account.

Here is an example of the landing I use. If you would like this same landing page and save yourself the hassle of creating it on your own then click on this link

Next traffic source is going to buy solo ads from Udimi. I really like this place because you can search through and see real reviews from others. Also when you pay the money is held in escrow until you get your clicks. This will protect you from fraudulent solo sellers.

[Click here to register at Udimi](#)

Once inside click on find sellers at the top menu. Use the filter to search for more sellers.

Only pick a solo provider that has a list that is verified and has good ratings. Someone with a lot of good ratings will be a good provider you can purchase from.

Once you find a good seller then click on the buy solo button.

You will see its very simple to choose the plan you want. My suggestion would be to start off with 100 clicks. This way you can see how well the traffic performs. If you get a good optin rate on your landing page then buy more.

Swipe subject examples, remember your only job with a solo subject is to get the person to open up the email.

Hi ya

I see that you haven't grabbed this yet and just wanted to give you one more shot before it becomes a paid offer and while it's still fr.ee

Here is the fr.ee download I arranged for you. Please grab it fast while the download link is up.

==> Link

Soon they will replace the fr.ee download link with a "Buy Now" button so grab yours fast,

==> Link

Your gonna love this!

The link you provide inside the solo email will be directed to your landing page.

I suggest you use a tracking service to see the quality of the clicks you buy from these solo providers. My favorite service is [ClickMagick](#)

Next just add money to your account and click on order. Your solo will go out on the day booked. Now just wait for the traffic, or find another provider and get more traffic.

***** IMPORTANT**

If you are creating an audience with Biz Op traffic inside facebook. You have to be real careful with your facebook ad. Facebook hates the hype “make money in 3 minutes” type of ads.

Create some ads to your landing page and see what gets approved. But do not push it. Facebook will have no problem blocking your ads account. I know, I have had 2 blocked in the past.

Step 4 - Setup Autoresponder emails

This is how my emails look inside of aweber

If you are interested in picking up all 8 of the body copy of these email plus another 147 swipes then click here.

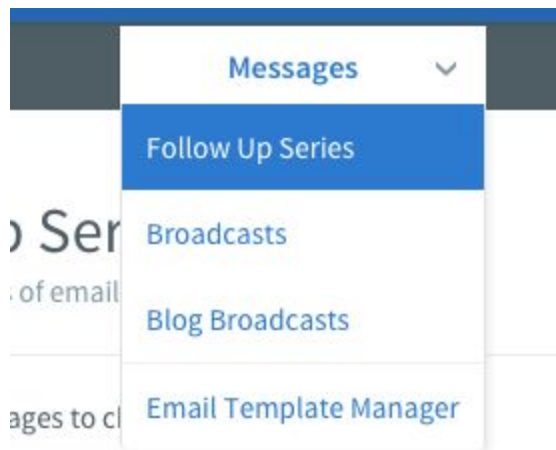

>> [Done for your email swipes](#)

When you have the swipes ready to go with your name and links inside. You're ready to create an email list and then upload the emails. You will then want to create an optin form.

Create a list first

Create A List

Once inside the new list create your follow up emails

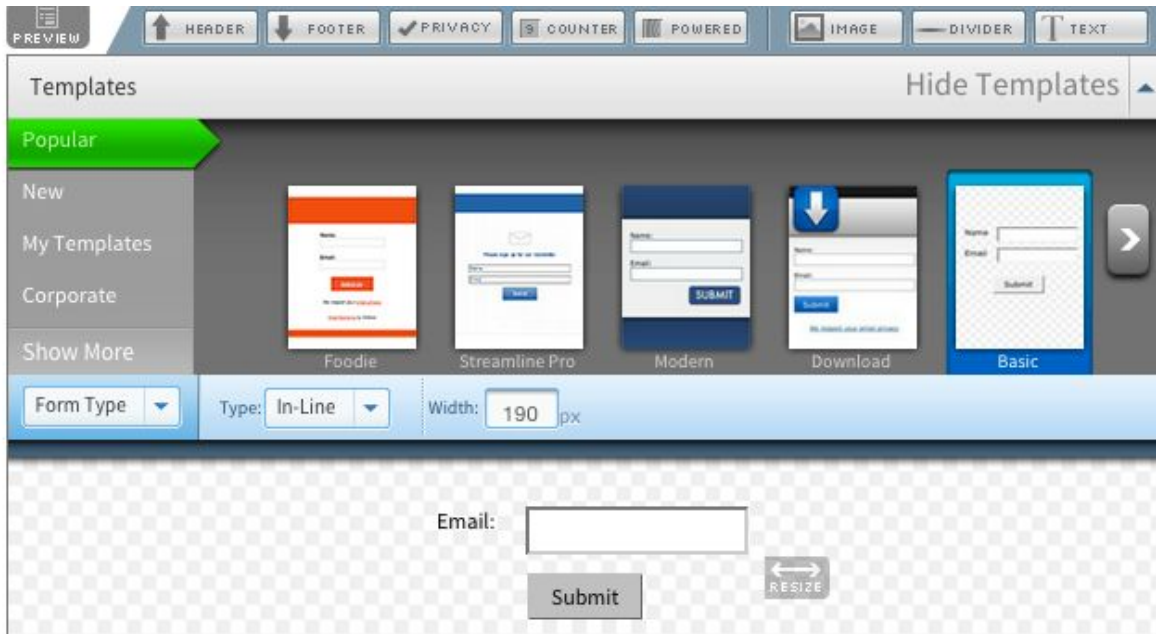

Create a series of 7-8 emails that go out each day. Inside the emails you send the traffic to your CPA offer inside clicksure.

Next is to create a form you can put on your landing page.

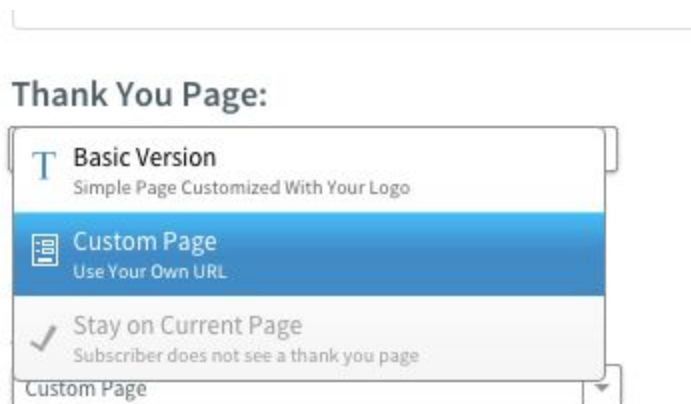

For html landing pages I will always just use the basic template inside aweber.

Its the smallest and will fit nice inside your landing page.

On step 2 you will want to click on custom page. Here you enter in your CPA OFFER LINK (not your landing page).

Next go to step 3 and grab the code to put inside your landing page.

I Will Install My Form

You are comfortable with HTML and have access to edit your pages

Advanced Design Customization

Now you're all done with the autoresponder. What will happen now is people will get your 8 emails and then it stops. But I would continue after that to send out daily broadcasts. Offer other products similar that might help out the person on your list.

This is your chance to build a responsive list to keep promoting other products. **Why is this important?** Because what if the offer at clicksure goes down. Or what if your traffic sources disappear? You still have your list to generate traffic.

Step 5 - Drive traffic to landing page

You have both Traffic Monsoon and Udimi setup so its just a matter of getting the traffic to your landing page. The traffic at Traffic Monsoon is not going to be as good as your own list or facebook ads. But it's cheap and if you limit yourself to just one traffic source then you miss out on a lot.

Udimi traffic will be better than Traffic monsoon, but not as cheap. But more targeted.

You should be buying traffic everyday, or a couple of times per week. Just don't make the mistake of getting excited with this report, go out try these sources, get some success, and then stop buying traffic.

Traffic to your landing page is the Lifeblood of your success online. Next comes conversions and you can work on that. But traffic is something you always need.

Step 6 - Reinvest profits with more Traffic

This is so important to understand. In the beginning you need to reinvest 100% of your profits back into buying new traffic. I know you may be broke and not working, or whatever your situation and need money now. But you can't pay the bills with your profits when you start.

At the start you're not going to make that much. And it takes everything you got to keep the ball rolling. Once you are in the \$10k per month range then you can start to take out some profits. Maybe less but I want you to understand you have to take a big % of your profits and put it back into buying more traffic.

It much easier to take out profits and pay your bills with \$30,000 coming in each month then it is with \$200.

Every dime you make has to go back into buying more TRAFFIC.
Period !!!!

Ok well I hoped you enjoyed this report. If you are new take everything slow and worked through it all. If this information is not new still take it slow and work through all the information.
